VISIONS OS

Quick Reference Guide · v1.5b

WHAT IT IS

A personal productivity OS for solo creatives. One HTML file — open it in any browser, no install, no account, no internet required. Your data lives entirely in your browser.

THE FOUR SYSTEMS

1 · DAILIES BANK

Your reusable task library. Pre-loaded with a film-production workflow — everything from Brief to Export. Each task belongs to a category and can be linked to a long-term Arc.

- Filter by ALL / SKILL / ACTIVE / ADMIN / CARRIED
- Drag tasks into the Quadrant to activate them for the day
- Right-click a task to edit it inline

2 · THE QUADRANT

Where your day actually happens. Four energy-state zones. Place tasks based on how you feel, not just priority.

LOCKED IN High energy · Creative output	**PROCESSING** High energy · Admin / logistics
CRUISE Low energy · Creative output	**MAINTENANCE** Low energy · Admin / logistics

3 · THE RUNWAY

Long-term goal tracking. Each Arc is a goal (e.g. 'Sound Design', 'First Pitch Deck'). Link Dailies to an Arc and the progress bar fills automatically as you complete those tasks.

- Drag Arcs to reorder priority
- Expand an Arc to see linked tasks, history, and milestone notes
- Status cycles: ACTIVE → PAUSED → COMPLETE

4 · DEBRIEF

Weekly performance snapshot. Run it manually or it auto-generates on Sundays. Shows completion rate, zone behaviour, Arc progress, avoidance patterns, and behavioural notes.

DAILY WORKFLOW

1	**MORNING SYNC** Hit ■ MORNING SYNC in the top bar. Copies a plain-text summary to clipboard — paste it wherever you do your morning check-in.
2	**LOAD THE QUADRANT** Drag tasks from the Dailies Bank into the zone that matches your current energy.
3	**WORK** As you complete tasks, mark them ✓ Done from the quadrant card. Skipped tasks return the next day. Removed tasks ask how to handle Arc links.
4	**END OF WEEK** Click RUN DEBRIEF in the Debrief tab to review the week.

KEY BEHAVIOURS TO KNOW

Task States

✓ Done from quadrant → removed from bank permanently (if Arc-linked)

→ Skipped → returns to the same quadrant zone the next day

✕ Removed from bank → asks: Unlink & Delete, or Archive in Arc?

Carry Count

Skip a task once → yellow tint. Twice → orange. Three times → red pulse. On the 4th attempt, you must log a reason before it moves.

Drift Mode

Right-click any quadrant card → Flag as Drift. Starts a 20-minute countdown. When it expires, you get a toast notification.

Paused Arcs

When an Arc is paused, its linked Dailies sink to the bottom of the bank with an amber '· PAUSED' tag.

WHAT NOT TO DO

✕ Don't clear your browser cache — that deletes all your data permanently.

✕ Don't open the app in Incognito — localStorage doesn't persist there.

✕ Don't rename the HTML file between sessions — same file, same browser = same data.

✕ Don't share your personal HTML file with someone expecting to see your data — they'll see a fresh app.

✕ Don't let tasks pile up in the Quadrant — clear it daily. It resets at midnight.

✕ Don't skip the Debrief for more than two weeks — you'll lose the pattern visibility.

SETTINGS ■

Click the gear icon (top right, next to Morning Sync).

- Quadrant zone colours — customise each zone's background
- Carry colour indicators — toggle yellow/orange/red escalation on/off
- Arc progress gradient — toggle grey-to-green bar fill on/off

---

Data is stored in your browser's localStorage — it never leaves your device. To share the app with someone, send them the .html file. Their data will be completely separate from yours.
